

Undelete⁵

Instant file recovery and data protection

Now with Version Protection for Microsoft® Office files!

Your data is too valuable to risk! Computer users assume they are protected against accidentally deleted files by the Windows® recycle bin and their backup systems—but they aren't! Here are just a few of the types of files that slip into the gap between bin and backup:

- Files that are overwritten
 - Files that are deleted over a network
 - Files created and deleted or changed between backup sessions
 - Files deleted by some viruses and worms

Undelete 5 to the rescue!

Undelete 5 solves this potentially disastrous problem by protecting *all* files, no matter how or when they were deleted, and providing the means for *instant* recovery. Undelete 5 can even restore older versions of Microsoft Office files (Word, Excel and PowerPoint) thanks to new Version Protection technology. In a network environment, Undelete 5 empowers users to recover their own files, reducing Help Desk traffic and IT costs.

Don't risk your valuable data—get complete protection real-time with instant recovery. Get Undelete 5 now!

Undelete®

Instant file recovery and data protection

Undelete 5 safely replaces the Windows recycle bin with the Undelete Recovery Bin that captures all files no matter how they were deleted. Only Undelete provides true up-to-the-minute data protection with *instant* recovery!

Undelete 5 features

-  Version Protection for Microsoft Office files allows recovery of older, overwritten versions of Microsoft Word, Excel and PowerPoint files—even if the original file has been deleted
-  Undelete Desktop Client enables network users to recover files directly from server-based Recovery Bins
-  Enhanced Recovery Bin browsing makes it easy to locate lost files by showing their original directory structure, even if folders have been deleted
-  Enhanced Emergency Undelete® recovers files deleted before Undelete was installed, provided they haven't been overwritten
- SecureDelete® is an electronic data shredder, ensuring that confidential files are permanently deleted

Undelete 5 Editions

Undelete 5 Server Edition protects server files, including files deleted by network clients

Undelete 5 Desktop Client allows connected workstations to recover files from Undelete 5 Server recovery bins

Undelete 5 Professional Edition protects locally-stored files and allows files to be recovered from Undelete Server recovery bins

Undelete 5 Home Edition provides comprehensive protection of locally-stored files

**If you don't have Undelete 5, your data is at risk!
Protect your valuable files—get Undelete 5 now!**

"A user who was planning to leave the company deleted all his work from the server. He did this over the course of a month, so the backups were useless after the first week. He tried to sell the files back to us. But unbeknownst to him, I was running Undelete, and was able to easily recover the data. It was quite a good feeling!"

— T.C. Waltz, *SafelT*
