

## Symantec™ Protection Suite Quick Reference Guide

### Protect critical information so you can focus on your business

Is your business ready for a solution that will help you get ahead of today's ever-changing threat landscape with greater efficiency, cost savings, and confidence? The threats that challenge the security and availability of your organization's business-critical assets change almost daily. Symantec Protection Suite creates a protected endpoint, messaging, and Web environment that is secure against today's complex malware, data loss, and spam threats and is quickly recoverable in the event of failure—all in an easy-to-deploy suite.

Reduce the cost of securing your environment and more effectively manage IT risk with Symantec's market-leading security and backup and recovery technologies. Symantec's integrated solutions can help you manage, secure, and recover information from the data center to mobile devices—independent of a platform or operating system.

Computer systems are also increasingly vulnerable to downtime or loss caused by a number of factors such as hard drive failure, OS corruption, user error, or natural disaster.

Symantec Protection Suite offers a solution for every size environment. Use the guidelines below to find the best fit for you.

Customer Pain Point	Symantec Protection Suite Delivers	Cost-Conscious	All-in-One	Robust and flexible
		Small Business Edition	Advanced Business Edition*	Enterprise Edition

## Symantec™ Protection Suite Small Business Edition

Uncompromised protection for small businesses  
Simple to install, deploy, and manage  
Designed for your budget

Symantec Protection Suite Small Business Edition is a simple and affordable solution designed for performance and easy management. The suite protects small business environments against today's most complex threats, securing desktops and servers from viruses and spyware, protecting email from spam and phishing threats, and quickly recovering desktops and laptops in the event of failure. You can now have superior protection with this easy-to-install and quick-to-deploy suite. Intuitive interfaces, preconfigured settings, and built-in wizards help get you up to speed quickly without training. And, with insights from Symantec Global Intelligence Network—the world's most extensive security resource—you'll have confidence that your company's assets are continuously protected from the latest threats so you can focus on running your business.

- Secure your endpoints from virus and malware threats.
- Protect your email from spam and phishing threats.
- Back up and recover desktops and laptops.
- Safeguard sensitive information.

## Symantec™ Protection Suite Advanced Business Edition

Multiple layers of protection for your business  
Simple management to help you scale  
Keeps mission-critical systems running smoothly in case of disruption

Symantec Protection Suite Advanced Business Edition is a new, all-in-one suite that protects critical business assets by securing your organization against today's malicious malware and spam threats and by rapidly recovering key systems. It is the first suite that offers superior security and high performance, combining endpoint, email, and data protection, plus backup and recovery capabilities for both servers and desktops. With market-leading technologies from the industry's endpoint security, messaging security, and backup and recovery leader, Symantec Protection Suite Advanced

Business Edition keeps your key desktops, servers, and core applications running and protected at all times, while simplifying IT administration by enabling you to centrally manage backup, recovery, and security tasks across the entire organization.

- Deploy market-leading technologies for complete protection.
- Protect your entire infrastructure against more threats.
- Recover data, desktops, and servers with ease.
- Control confidential information and safeguard intellectual property.

## Symantec™ Protection Suite Enterprise Edition

Multilayered protection from endpoint to gateway  
Unified management and administration  
Automatic backup and recovery, monitoring, updating, and policy enforcement

Symantec Protection Suite Enterprise Edition is an unparalleled combination of award-winning technologies from the world leader in security and data protection that enables you to completely protect, easily manage, and automatically control the assets most crucial to your business. This suite creates a protected endpoint, messaging, and Web environment that is secure against today's most-sophisticated malware, data loss, and spam threats, and can be quickly recovered in the event of failure. You can reduce the cost of securing both your Windows® and Mac® environments using Symantec's proven security and system recovery technologies and a Single Sign-On Web console to more-effectively manage the risks inherent in today's complex IT infrastructures.

- Deploy today's most-trusted technologies across the infrastructure, end to end.
- Control access to network resources and protect the perimeter against Web-related threats.
- Protect against more threats and on more platforms, including Mac, Linux®, and Windows Mobile support.
- Gain increased visibility into your environment to protect more effectively.
- Leverage trusted, actionable intelligence to proactively anticipate threats and minimize downtime.

Symantec Endpoint Protection offers two options			
Business Challenge	Protection Technology	Symantec Endpoint Protection Small Business Edition	Symantec Endpoint Protection
Don't have an IT staff and require easy and fast installation	20-minute client and server install	✓	
Don't want antivirus to impact client systems	High-performance antimalware client	✓	✓
Want overall protection	Comprehensive protection that's more than antivirus	✓	✓
Don't want antivirus to impact client systems	Data loss prevention technologies		✓

**Consider these additional products to increase your protection and add value:**

**Symantec™ Network Access Control**

Securely controls access to corporate networks, grants access only to endpoints that comply with security policies, and easily integrates with existing network infrastructures (self-enforcement included in Symantec Protection Suite Enterprise Edition).

**Symantec™ Web Gateway Appliance**

An innovative security gateway appliance that protects organizations against Web 2.0 threats, including malicious URLs, spyware, botnets, viruses, and other types of malware, and provides controls for Web and application use (software licenses included in Symantec Protection Suite Enterprise Edition).

**Symantec Brightmail™ Appliance 8300 series**

Delivers inbound and outbound messaging security with effective and accurate real-time antispam and antivirus protection, advanced content filtering, data loss prevention, and email encryption—all in a physical appliance platform (software licenses/virtual appliance included in Symantec Protection Suite Enterprise Edition and Symantec Protection Suite Advanced Business Edition).

**Symantec Backup Exec™ System Recovery Server Edition**

A simple, cost-effective backup and recovery solution that helps minimize downtime and avoid disaster by easily recovering individual data files and folders or complete Windows systems in minutes—not hours or days—even to different hardware, virtual environments, or remote locations (included in Symantec Protection Suite Advanced Business Edition).

**Symantec Backup Exec™ 2010**

Delivers reliable backup and recovery, protecting data while helping reduce storage and management costs through integrated deduplication and archiving technology (an ideal complement to Symantec Protection Suite Enterprise Edition).

**Symantec™ Data Loss Prevention**

Delivers a unified solution to discover, monitor, and protect confidential data wherever it is stored or used.

**Symantec™ Endpoint Encryption**

Provides advanced encryption for desktops, laptops, and removable storage devices.

**Altiris™ Client Management Suite from Symantec**

Tightly integrates industry-leading technologies to help you control your IT environment and reduce the total cost of owning client systems. The suite automates time-consuming and redundant tasks to minimize the cost and effort associated with deploying, managing, securing, and troubleshooting systems.
